Re: Ex Parte Presentation  
CC Docket # 97-213 (CALEA)

**Federal Communications Commission  
Office of Secretary**

Dear Ms. Salas:

On Friday, May 5, 1998, the Cellular Telecommunications Industry Association ("CTIA"), represented by Brian Fontes and Randall Coleman, met with Peter Tenhula, Legal Advisor, Commissioner Powell's Office, regarding the above-referenced proceeding. The parties discussed CTIA's position on these matters, in conjunction with the attached materials.

Pursuant to Section 1.1206 of the Commission's Rules, an original and one copy of this letter and its attachments are being filed with your office. If you have any questions concerning this submission, please contact the undersigned.

Sincerely,

Cleveland Lawrence III

**TITLE:** Enhanced Surveillance Services

---

**SOURCES:** CTIA

---

**DISTRIBUTION:** TR45.2, ESS

---

**CONTACT:** Ed Hall, CTIA 202/736-3259

---

**ABSTRACT:** This contribution identifies CTIA's enhanced surveillance services referred to as the "Punch List" that are considered "beyond" the scope of CALEA.

---

**RECOMMENDATION:**

CTIA recommends that the enhanced services identified in this contribution be accepted for standardization. This list should not be considered as "mandatory requirements" by any government agency, federal, state or local law enforcement.

---

**NOTICE:**

The contributor grants a free, irrevocable license to the Telecommunications Industry Association (TIA) to incorporate text contained in this contribution and any modifications thereof in the creation of a TIA standards publication; to copyright in TIA's name any TIA standards publication even though it may include portions of this contribution; and at TIA's sole discretion to permit others to reproduce in whole or in part the resulting TIA standards publication. This contribution has been prepared by CTIA to assist the Standards Committee TIA TR45. Specifically, CTIA reserves the right to modify, amend, or withdraw this contribution.

---

**COPYRIGHT:**

Permission is granted to TIA Committee participants to copy any portion of this document for the legitimate purposes of the TIA. Copying this document for monetary gain or other non-TIA purpose is prohibited.

good faith

TR45.2 ESS/98.02.04.03

### **Enhanced Surveillance Services** **Beyond the Scope of CALEA**

1. **Background:** During the TR45.2 December 1997 meeting, CTIA submitted a contribution (TR45.2/97.12.17.01) requesting that the features and services, as identified and discussed during the TR45.2 LAES Ad Hoc meetings, referred to as the "*Punch List*" be now considered for technical standards development within a newly defined TR45.2 Engineering Sub-Committee. CTIA further recommended certain stipulations impacting the scope of work. [Law enforcement has expressed a strong desire for the additional capabilities identified on the "punch list" and, in response to this customer request, CTIA urges the industry to move forward to develop standards to meet law enforcement's needs assuming that law enforcement will be paying for such services in the future. Those conditions are listed below for clarification:
  - That *this* standards effort is *beyond* the scope of J-STD-025: J-STD-025 supports the requirements of CALEA. This particular effort reflects *Enhancements* in support of customer (LEA) requirements.
  - That this effort should in no way be considered an impediment to the immediate development and implementation of functionality and capabilities defined in J-STD-025.
  - That this standards effort is a logical evolution of technical standards and should be worked as previously agreed to, in a joint effort with T1, within TR45.2.
  - That "'Punch List'" items to be addressed/defined in this effort may be those that are deemed technically feasible and lawful.

3rd

The standards resulting from this effort would enable a set of features and services that could be offered to law enforcement on an "a la carte, pay per service basis". The standards would be in addition to but, completely separate from the industry's CALEA "safe harbor" standard J-STD-025 (or its ANSI replacement).

During August, 1997 the FBI provided industry with the following "*Punch List*". The list was submitted to DOJ as "capabilities missing from SP-3580A".

1. **Conference Calling I: Who is part of a call at all times**
2. **Conference Calling II: Party Hold and Party Join**
3. **Feature Keys**
4. **Network Signals**
5. **Timing**
6. **Status of Surveillance (Message)**
7. **Status of Surveillance (C-Tone)**
8. **Standard Delivery Interface**
9. **Feature Status Message**
10. **Dialing Information**
11. **Separated Call Content**

During a January 23, 1998 meeting between CTIA, other industry representatives, and the Department of Justice the FBI revealed that "*Separated Call Content*" and "*Standardized Physical Interface*" are no longer "*Punch List*" items. They further stated that they would no longer require "toggle switches" on any remaining "*Punch List*" items.

2. **Proposed Work Plan:** Based on the forgoing information CTIA submits the following list as the most current, agreed to "*Punch List*":

### **CTIA Punch List**

- 1. **Conference Calling I:**  
Report the identities of the parties to a conversation at all times to the extent known to the switching system.
- 2. **Conference Calling II:**  
Monitor a multi-party or conference call established by the intercept subject when two or more parties are allowed to converse after the intercept subject leaves the conversation.
3. **Feature Keys**  
Report and identify intercept subject initiated signaling used to invoke or control features (e.g., feature keys or flash).
4. **Network Signals**  
Report and identify network signaling applied toward the intercept subject where such signaling cannot be derived through examination of the delivered call content (e.g., power alerting, out-of-band tone commands).
5. **Improved Correlation**  
Improve the correlation between communications delivered over CCCs and the call identifying information delivered over CDCs.
6. **CDC and Surveillance Status**  
Periodically ensure each active CDC is operational.  
Periodically report the active surveillance's for each CDC.
7. **Status of Surveillance (C-Tone)**  
Periodically ensure each active CCC is operational.
8. **Feature Status Message**  
Report changes at least once every 12 hours to the intercept subject's feature profile that may affect LEAs ability to obtain surveillance (e.g., activation's, deactivation's, programming of features or services)
- 9. **Dialing Information**  
Report post cut-through digits when such digits are known not to control Customer Premises Equipment (CPE) (e.g., answering machines, voice mail services, PBXs, electronic key systems, electronic banking, voice response systems).

3. Scope:

- This list does not suggest nor does it recommend any prioritization of work for these services but rather remands that task to the FBI representative or to the body of the TR45.2 Ad Hoc.
- Since these are simply enhanced services to the capabilities established in J-STD-025 and will be requested as such by LE at the time of a lawful intercept, legal issues associated with some of these "*Punch List*" items should not be a consideration.

4. Concerns: Discussions between industry representatives, DOJ and Congress continue regarding Capability, Cost Recovery, Capacity and Compliance Date. CTIA will provide updated information on these topics as they may impact the proposed work of Enhanced Surveillance Services (ESS).

## SUMMARY

The Commission now has before it petitions for rulemaking under the Communications Assistance for Law Enforcement Act ("CALEA"), 47 U.S.C. § 1001 *et seq.*, from the Cellular Telecommunications Industry Association ("CTIA"), the Center for Democracy and Technology ("CDT"), the U.S. Department of Justice and the Federal Bureau of Investigation ("FBI") [collectively, "Department"], and the Telecommunications Industry Association ("TIA"). CDT and the Department ask the Commission, under Section 107(b) of CALEA, 47 U.S.C. § 1006(b), to declare the industry "safe harbor" standard, promulgated by TIA as J-STD-025 in November 1997, to be deficient. The Department says the standard fails to provide enough capabilities while CDT claims the standard provides too many, therefore impinging on privacy. TIA, in its petition, asks the Commission to resolve the dispute.

CTIA, the Personal Communications Industry Association ("PCIA"), and the United States Telephone Association ("USTA"), [collectively, the "Carrier Associations"], ask the Commission to resolve the dispute over the reach of CALEA. The Carrier Associations also urge the Commission to (1) remand to TIA's TR45.2 subcommittee any change in the industry standard brought about in this rulemaking; (2) toll the CALEA compliance date during the rulemaking; (3) grant an industry-wide extension to allow adequate time to implement any revised standard; (4) ensure that any rule promulgated by the Commission is voluntary so that carriers retain the choice of how to meet the assistance capability requirements of CALEA; and (5) in order to avoid more delay in CALEA's implementation, determine whether compliance is reasonably achievable at this time.

<sup>3</sup> In the Matter of Establishment of Technical Requirements and Standards for Telecommunications Carrier Assistance Capabilities Under the Communications Assistance for Law Enforcement Act, Department and FBI Joint Petition for Expedited Rulemaking filed March 27, 1997 [hereinafter "Department Petition"].

Telecommunications Industry Association ("TIA").<sup>4</sup> CDT and the Department ask the Commission, under Section 107(b) of CALEA, 47 U.S.C. § 1006(b), to declare the industry "safe harbor" standard, promulgated by TIA as J-STD-025 in November 1997, to be deficient. The Department says the standard fails to provide enough capabilities while CDT claims the standard provides too many, therefore impinging on privacy. TIA, in its petition, asks the Commission to resolve the dispute. CTIA warned nearly eight months ago in its petition that the Commission would have to intervene to resolve this dispute, but the Department opposed the petition. The very issues in dispute then are now before the Commission on the Department's petition.

CTIA again,<sup>5</sup> now joined by the Personal Communications Industry Association ("PCIA")<sup>6</sup> and the United States Telephone Association ("USTA")<sup>7</sup> [collectively the "Carrier

---

<sup>4</sup> *In the Matter of Rulemaking Under Section 1006 of the Communications Act of 1934, as Amended, and Section 107 of the Communications Assistance for Law Enforcement Act to Resolve Technical Issues and Establish a New Compliance Schedule*, TIA Petition for Rulemaking filed April 2, 1997 [hereinafter "TIA Petition"].

<sup>5</sup> CTIA, a nonprofit corporation organized under the laws of the District of Columbia, is an international organization representing the wireless communications industry. One of its primary purposes is to promote the common interests of its members. Membership in the association encompasses all providers of the commercial mobile radio services -- including 48 of the 50 largest cellular providers and personal communications services providers -- and others with an interest in the wireless communications industry, such as the manufacturers of equipment used to provide commercial mobile radio services.

<sup>6</sup> PCIA is a nonprofit corporation organized under the laws of Virginia. Established in 1949, the international trade association represents providers of personal communications services, paging, mobile data services, communications site managers, equipment manufacturers and others providing products and services to the wireless industry, and promotes the common interests of its members.

<sup>7</sup> USTA, a nonprofit corporation organized under the laws of Illinois, is a trade association representing the common interests of approximately 1,000 local exchange telephone companies. Member companies include some of the largest publicly held U.S. companies serving millions of customers; roughly twenty-five mid-sized companies with between 50,000 and 1,000,000 access lines; and hundreds of small companies, many of which are rural, family-owned enterprises, and/or cooperatives owned by their members. Together, USTA companies provide over 95 percent of the

Associations"], asks the Commission to resolve the dispute over the reach of CALEA. The Carrier Associations also urge the Commission to (1) remand to TIA's TR45.2 subcommittee any change in the industry standard brought about in this rulemaking; (2) toll the CALEA compliance date during the rulemaking; (3) grant an industry-wide extension to allow adequate time to implement any revised standard; (4) ensure that any rule promulgated by the Commission is voluntary so that carriers retain the choice of how to meet the assistance capability requirements of CALEA; and (5) to avoid more delay in CALEA's implementation, determine whether compliance is reasonably achievable at this time.

**I. THE COMMISSION MUST FIRST DETERMINE WHETHER A CAPABILITY IS REQUIRED BEFORE DECIDING HOW TO IMPLEMENT IT**

The Commission must first decide *whether* a particular capability is required by CALEA, which is fundamentally a legal question, before it decides *how* to implement it, which is fundamentally a technical issue. The Commission should only take the first step, deferring the second determination to the industry standards formulating group. To do otherwise puts the cart before the horse and wastes valuable time and resources addressing technical questions that may never need to be answered if the Commission determines, and the courts ultimately decide on any appeal taken from the Commission's determination, that petitions now before the Commission have merit.

**A. Step 1 — Whether a Capability is Required by CALEA is a Legal Issue**

Whether a particular capability is required by CALEA is a legal question. The Commission must apply the ordinary tools of statutory construction to make its determination. For example, the Commission will want to understand where in CALEA the Department's

---

local telephone company-provided access lines in the country. One of USTA's primary purposes is to promote the common interests of its members.

"punch list" items can be found, and if not expressly present, what legal justification can be made for including the feature.

The Commission must start from the fundamental proposition that CALEA is an exception to the broad, general prohibition on wiretapping and as such it must be viewed narrowly. This is consistent with the clearly stated intent of Congress:

The Committee urges against overbroad interpretation of the requirements. The legislation gives industry, in consultation with law enforcement and subject to review by the FCC, a key role in developing the technical requirements and standards that will allow implementation of the requirements. The Committee expects industry, law enforcement and the FCC to narrowly interpret the requirements.<sup>8</sup>

The Commission is presented with starkly contrasting petitions. The Department's petition urges the broadest interpretation at every turn. CDT's petition argues in favor of the narrow approach Congress intended. TIA and the Carrier Associations strongly believe the industry standard meets both the spirit and letter of the law. The Commission should not miss the fact that J-STD-025 was the product of a careful review of the legal requirements of CALEA. The Commission is aware that industry and Department legal experts met on several occasions to discuss the legal requirements of CALEA, ultimately rejecting the Department's "punch list" because the features exceeded the statutory mandate. Thus, the current standard represents the industry consensus on the scope and reach of CALEA and is entitled presumptively to deference by the Commission.<sup>9</sup>

The Commission should require any petitioner seeking a deficiency determination to provide the legal justification for his assertions. For example, industry has been told repeatedly that the Department performed a detailed legal analysis of CALEA, but despite

---

<sup>8</sup> H. Rep. No. 103-837, at 23, *reprinted in* 1994 U.S.C.C.A.N. 3489, 3502-03.

<sup>9</sup> H. Rep. No. 103-837, at 19, *reprinted in* 1994 U.S.C.C.A.N. 3489, 3499 ("The bill allows industry associations and standard-setting bodies, in consultation with law enforcement, to establish publicly available specifications creating 'safe harbors' for carriers.").

industry requests, that analysis has not been made public.<sup>10</sup> The Department's petition contains no legal analysis, but rather is a catalogue of wants and needs without any legal analysis or citation to where in CALEA the desired requirements can be found. As the petitioner, the Department must make a legal case to support its filing and the Commission should require it as a predicate for going forward.

In addition, the Commission's legal review of CALEA requirements should not be limited to the Department's "punch list" or to CDT's privacy concerns. Rather, the entire standard should be reviewed by the Commission. During the standards process, many concerns were raised about the complexity of the standard brought about by including requirements that did not have a foundation in CALEA. For example, some industry members asserted that partially dialed digits that do not set up a call and therefore do not identify the call's "origin, direction, destination or termination" are not "call-identifying information" as the term is used in CALEA. Many participants in the standards meetings argued in good faith that this information should not be provided, but the standards group as a whole acceded to law enforcement's demands. All interested parties in this rulemaking should have the opportunity to address any legal question raised about the standard or the capabilities proposed.

Critical to the Commission's legal determination in this rulemaking will be defining "call-identifying information." Despite the clear admonition of Congress noted above, the Department urges the Commission to adopt a "broad definition" of call-identifying information.<sup>11</sup> During standards meetings, the Department's definition extended to demanding

---

<sup>10</sup> See Department Petition, App. 5 (citing Letter from Assistant Attorney Colgate to Tom Barba, dated Feb. 3, 1998 ("DOJ has reviewed the 11 'punch list' capabilities in reference to CALEA, its legislative history, and the underlying electronic surveillance statutes. In addition, DOJ reviewed a memorandum evaluating the 'punch list' under CALEA that was prepared by the Office of General Counsel ("OGC") of the FBI.")).

<sup>11</sup> Department Petition at 34.

tracking information on wireless call handoffs as somehow indicating the "direction" of the call through the network, despite the fact that CALEA does not cover location information at all. Further, call-identifying information has been stretched during negotiations with the Department to mean virtually any signal carried in the network if it can be perceived by any person at any time. Thus, the Department has argued that voice message waiting indicators are "call-identifying." These are issues to be addressed and resolved by the Commission in this rulemaking as part of validating industry's definition of call-identifying information.<sup>12</sup>

Once defined, the Commission must determine when call-identifying information is "reasonably available."<sup>13</sup> Section 103 of CALEA imposes an obligation on carriers only to access call-identifying information that is reasonably available.<sup>14</sup> The Department offers no analysis or discussion of this term. For example, there currently is no telephony reason to identify when parties join or drop from a conference call. It may make for nice evidence, but it is not reasonably available because carriers do not collect the information, have no business need for it, and have no current capability in their switches to generate it. To grant the Department's petition in that regard would be to foist on carriers an obligation to create an entirely new feature that has no value. As a basic principle, the Carrier Associations believe that the Commission should determine that reasonably available call-identifying information is

---

<sup>12</sup> J-STD-025 defines call-identifying information to mean what Congress intended -- "the numbers dialed or otherwise transmitted for the purpose of routing calls through the carrier's network." H. Rep. No. 103-837, at 21, *reprinted in* 1994 U.S.C.C.A.N. 3489, 3501.

<sup>13</sup> In an outrageous twisting of the express language of the law, the Department proposes that the Commission adopt a rule that defines call-identifying information as "all dialing or signaling information" rather than reasonably available information. *See* Department Petition, App. 1 at 2. This is precisely the sort of overreaching that occurred in the standards meetings and against which the Commission must guard.

<sup>14</sup> *See* 47 U.S.C. § 1002(a)(2) (a carrier's obligation includes "expeditiously isolating and enabling the government pursuant to a court order or other lawful authorization, to access call-identifying information that is reasonably available to the carrier").

only that information available at a switch to a carrier and which is used for call processing or collected for some business purpose.

In sum, the Commission should make its legal determination regarding required capabilities based on a showing by petitioners of the legal grounds in support of the capability requested. Only after this legal determination has been made can the technical issues be addressed. The Carrier Associations oppose the Department proposal seeking Commission-level review of the technical issues. If the Commission adopts the Department's course, it will ensure further delay in implementing CALEA, as no carrier will accept the Department's proffered technical implementation as other than an arbitrary and capricious rule. Further, the Commission should obtain comment from the public on any capability or feature of the standard that is not grounded in CALEA and develop a full record. Finally, the Commission should, as a threshold matter, define call-identifying information and determine when it is reasonably available. This should be the scope of the rulemaking on the assistance capability requirements of CALEA.

**B. Step 2 - How to Implement the Commission Rule is a Technical Issue Best Left to Industry Standards Groups**

The Commission is aware that CTIA initiated the Enhanced Electronic Surveillance ("ESS") project through TIA to create industry consensus requirements for implementation of the Department's "punch list." The ESS was industry's good faith effort to respond to the Department's demand for additional, enhanced surveillance services that industry viewed as outside CALEA. All parties agreed that these enhanced services should be standardized and compatible with J-STD-025, whether or not the parties could agree on whether the services were CALEA-required capabilities.

The first two ESS meetings revealed that development of a standard for the "punch list" items is not as simple as the Department's proposed rule suggests. In fact, at these meetings, the Department could not cogently discuss the technical implementation of their

purported requirements. Rather than nine requirements, the discussion quickly revealed a complex web of new services that far exceeds the Department's public presentation or its proposed rule in this proceeding.

For example, the Department's proposed rule and petition calls for, as one requirement, delivery of call-identifying information contemporaneous with the communications, specifying an accuracy rate of 100 milliseconds for time stamps (i.e., no more than 100 ms difference between the time of the event and the time recorded in the time stamp) and delivery of the information in as near real time as possible, but no later than three seconds after the occurrence of the associated call event.<sup>15</sup> Without addressing the merits of the request, the Commission should understand that industry has informed the Department repeatedly that its timing demands are both unrealistic and really comprised of multiple requests within this one "punch list" item. These requests include a demand for synchronization between the call content channel and the call data channel, the use of Coordinated Universal Time to allow correlation between various systems, and the ability to define events so that the time reported is consistent between manufacturers because carriers often have equipment from more than one manufacturer within their networks.

The Commission should understand that the Department's proposed technical requirements have been criticized roundly by industry experts as inefficient, over-engineered and technically inadequate, as the example illustrates. Again, to demonstrate industry's good faith in the implementation of CALEA, the "punch list" items will continue to be explored at ESS meetings until the Commission and any court finally act on the petitions.

---

<sup>15</sup> Department Petition at 51-52.

Once the Commission has determined *what* capabilities are required,<sup>16</sup> there can be no dispute that industry will faithfully and expeditiously reach consensus on a standardized manner for implementation. That process will be expedited due to the industry efforts in the ESS process. Ultimately, the Commission has the authority to remand any changes in the standard to TR45.2 for final implementation, even where Congress empowers the Commission by statute to promulgate rules itself.<sup>17</sup>

## **II. EXPEDITED REVIEW IS WARRANTED FOR THE LEGAL ISSUES PRESENTED BY THE PETITIONS**

The Department seeks expedited review of its petition.<sup>18</sup> Expedited review is appropriate only when the party making the request has shown that expedited treatment is required to serve the public interest.<sup>19</sup> In support of its request, the Department merely alleges that further delay is not desirable or in the public interest.

The Carrier Associations certainly agree that delay and uncertainty are not desirable. However, the Commission should understand that the delay here is a product of the

---

<sup>16</sup> For each capability, the Commission should specify the *requirement* in rule form rather than, as the Department does, design the implementation solution.

<sup>17</sup> See *In the Matter of Technical Requirements to Enable Blocking of Video Programming Based on Program Ratings: Implementation of Sections 551(c), (d), and (e) of the Telecommunications Act of 1996*, ET Docket No. 97-206 (released Mar. 13, 1998). Section 551(c) of the Telecommunications Act of 1996 (codified at 47 U.S.C. § 303(x)) requires the Commission to adopt rules requiring that any TV shipped in interstate commerce and measuring 33 cm or greater be equipped with a feature designed to enable viewers to block programming with a common rating. Section 551(d) of the Act (codified at 47 U.S.C. § 330(c)) instructs the Commission to oversee "the adoption of standards by industry for blocking technology." In its V-Chip order, the Commission deferred to and adopted standards (EIA-608, EIA-704) developed by the Electronics Industry Association. The Commission determined that doing so was preferable to unnecessary government regulation. The same holds true here -- moreover, TIA will have ongoing responsibilities with the standard as it is updated to reflect changes in technology.

<sup>18</sup> Department Petition at 64.

<sup>19</sup> *Omnipoint Corp. v. PECO Energy Co.*, PA 97-002, 1997 FCC LEXIS 2056, at \*2 and n.14 (released Apr. 18, 1997) (request denied).

Department's opposition to CTIA's petition filed on July 16, 1997. CTIA sought Commission intervention then because the Department was demanding the same exotic capabilities in the standards process it now seeks to impose through this rulemaking. Indeed, the Department waited four months after promulgation of the industry standard to bring this challenge. Moreover, the Department just published its capacity requirements on March 12, 1998, almost three years late.<sup>20</sup> The petitions now pending raise serious issues that cannot be ignored, treated lightly or steamrolled through some expedited process that fails to provide parties adequate time to respond to very complex technical issues.

The Carrier Associations agree with TIA's suggestion that a 30-day comment and 30-day reply period are sufficient, but only to address the legal issues. The technical merits of the Department's proposed rule are much more complex and should be remanded to the TR45.2 subcommittee. Otherwise, if the Commission proceeds with comment on the technical issues, it will be undertaking the functional equivalent of a ballot review for publication of a standard. The Commission can expect hundreds of comments on the proposed rule and hundreds more on the comments then submitted. A 60-day pleading cycle is not sufficient to address or even begin to resolve such technical issues.

The Commission is urged to state at the outset that it will adopt the Carrier Association's two-step approach to this rulemaking as described above. Failing that, the Department, carriers, and their vendors will be forced to duplicate their efforts before the Commission and the industry standards group. Based on the ESS experience to date, the Commission will not be able to develop a sufficient record to resolve these technical issues absent the give and take that informs industry consensus standards. Moreover, the parties may be making comments on the technical merit of capabilities that may never be required. Given that the ESS is underway (another meeting is scheduled for April 14-15 in Tucson,

---

<sup>20</sup> Final Notice of Capacity, 62 Fed. Reg. 12218 (Mar. 12, 1998).

AZ), no time will be lost in either remanding any change in the standard or delaying comment on technical merit until the completion of the Commission's legal determination and possibly any appeal.

### **III. AN IMMEDIATE STAY OF CALEA COMPLIANCE IS WARRANTED DURING THIS RULEMAKING AND AN INDUSTRY-WIDE EXTENSION SHOULD BE GRANTED**

The Department proposes that development to the industry standard should proceed despite this rulemaking.<sup>21</sup> The attempt to bifurcate implementation of the CALEA standard is inefficient and cost prohibitive, and certainly will lead to further delay in implementation of CALEA. Moreover, it assumes that the Commission will not grant the CDT petition, which seeks to remove certain capabilities from J-STD-025.<sup>22</sup>

TIA opposes the Department's suggestion, stating that "[u]ntil the current uncertainty surrounding J-STD-025 has been resolved, manufacturers should not be required to devote engineering resources developing and implementing a standard that may be radically modified in the next few months."<sup>23</sup> The Carrier Associations agree and note that the same holds true for carriers that are consulting with their manufacturers for specific implementation needs. Thus, an immediate stay of CALEA compliance pending completion of this rulemaking should be granted until a clear determination of capability requirements is made.<sup>24</sup>

---

<sup>21</sup> Department Petition at 4.

<sup>22</sup> CDT also requests an indefinite delay in implementation of CALEA until the Commission completes review of all issues. CDT Petition at 12.

<sup>23</sup> TIA Petition at 5.

<sup>24</sup> In addition, a stay is required because the Commission may not complete this rulemaking by the October 1998 compliance date. Carriers then may be at risk of enforcement actions under Section 108 of CALEA.

Further, on July 16, 1997, CTIA requested that the Commission initiate a rulemaking to resolve the very questions now raised by the Department in its petition.<sup>25</sup> As part of that petition for rulemaking, CTIA expressly requested that the Commission grant an industry-wide extension of the CALEA compliance date.<sup>26</sup> CTIA, joined by PCIA and USTA, expressly renews that request here.

The Commission already has received one request for an extension of the compliance date pursuant to Section 107(c).<sup>27</sup> It can expect hundreds more as carriers seek to protect themselves from potential enforcement actions under Section 108 after October 25, 1998. Absent immediate Commission action to at least stay CALEA compliance during this rulemaking, carriers will be left with no choice but to file extension requests rather than risk an enforcement action or gamble on completion of this rulemaking before the compliance date arrives.

On the petitions before it, the Commission can grant an industry-wide extension of the compliance date. The Department suggests that the Commission should make the final standard effective 18 months after the date of the Commission's decision and order.<sup>28</sup> TIA proposes that the Commission establish a reasonable compliance schedule of at least 24

---

<sup>25</sup> See *In the Matter of Implementation of Section 103 of the Communications Assistance for Law Enforcement Act, Petition for Rulemaking*, CTIA Petition (July 16, 1997).

<sup>26</sup> On March 27, 1998, the Department moved to dismiss CTIA's petition on the grounds that the TIA publication of J-STD-025 rendered the petition moot. Yet, inexplicably, the Department fails to mention that CTIA also requested an industry-wide extension of the CALEA compliance date as part of the petition. See CTIA Petition at 8-12.

<sup>27</sup> See Petition for the Extension of the Compliance Date under Section 107 of the Communications Assistance for Law Enforcement Act by AT&T Wireless Services, Inc., Lucent Technologies Inc., and Ericsson Inc., filed March 30, 1997.

<sup>28</sup> Department Petition at 63.

months from the date of Commission's final decision plus an additional year for the industry standards group to complete its work upon remand by the Commission.<sup>29</sup>

The Carrier Associations agree with TIA. The Commission has the authority to grant such an extension under Section 107(b)(5), which permits the Commission to provide a reasonable time and conditions for compliance with and transition to any new standard.<sup>30</sup> Accordingly, the Commission should state at the outset of this rulemaking that CALEA's compliance date is extended by 24 months after completion and promulgation of any revised standard.

#### **IV. THE DEPARTMENT'S RULE MAKES THE STANDARD MANDATORY FOR ALL CARRIERS IN VIOLATION OF CALEA**

The Department apparently proposes to make implementation of the final rule mandatory for all carriers.<sup>31</sup> Here again, the Department attempts to rewrite CALEA to meet its ends. The "safe harbor" standard contemplated in CALEA is purely voluntary. Those carriers that choose to adopt the standard will have a safe harbor so long as they meet its requirements. However, nothing in CALEA prevents a carrier from adopting another technical solution so long as it meets the capability requirements of Section 103. To the contrary, CALEA expressly forbids the Department from requiring any specific design of

<sup>30</sup> 47 U.S.C. § 1006(b)(5). The Commission also may act pursuant to Section 107(c), 47 U.S.C. § 1006(c), and its general CALEA implementation authority under Section 301 (*codified at* 47 U.S.C. § 223), to grant an extension of the compliance date. The Commission is on notice through its recent NPRM that many carriers intend to file extension requests absent an industry-wide extension. A blanket extension as sought by the Carrier Associations certainly is necessary to implement the requirements of CALEA in an orderly and cost-effective way.

<sup>31</sup> See Department Petition, App. 1, at 4 ("telecommunications carriers shall ensure that their equipment, facilities, or services . . . provide the electronic surveillance assistance capabilities defined in the electronic surveillance interface standards set forth in [proposed] Sections 64.1707 through 64.1708, below").

equipment, facilities, services, features, or system configurations to be adopted by any carrier or manufacturer.<sup>32</sup>

The Commission should make clear at the outset of this rulemaking that any resulting rule will be *voluntary* and that carriers remain free to choose any implementation that meets CALEA's requirements. By adopting the Carrier Association's two-step process, the Commission will ensure that the resulting standard is a consensus document capable of implementation by any carrier or manufacturer. The Department's approach is a prescription to lock in obsolescence when Congress sought to ensure innovation would continue.<sup>33</sup>

## V. REASONABLE ACHIEVABILITY REQUEST

CDT asks the Commission to find that compliance with CALEA's capability requirements is not reasonably achievable with respect to equipment, facilities or services installed or deployed after January 1, 1995.<sup>34</sup> The Carrier Associations join CDT's petition, but for slightly different reasons.

First, the delay in meeting CALEA deadlines was a direct result of the Department's failure to timely publish capacity requirements and its overreaching in regard to the assistance capability requirements. As noted above, the Department could have joined the capability issue last year but failed to do so. There can be no doubt that delay has increased the cost of CALEA compliance.

The absence of standards and capacity information has not slowed industry growth, however. The Telecommunications Act of 1996 and the Commission's spectrum auctions

<sup>33</sup> H. Rep. No. 103-837, at 19, *reprinted in* 1994 U.S.C.C.A.N. 3489, 3499 ("The Committee's intent is that compliance with the requirements in the bill will not impede the development and deployment of new technologies. The bill expressly provides that law enforcement may not dictate system design features and may not bar the introduction of new features and technologies.").

<sup>34</sup> CDT Petition at 10.

unleashed a tidal wave of new facilities-based providers, some of whom are burdened with enormous debt and tight construction schedules, and great expansion of existing carrier services. To retrofit all of the pre-standard hardware and software now certainly will have serious effects on competition and subscriber costs

For its part, the Department has done everything it can to increase the cost of CALEA compliance on industry. For example, despite the fact that CALEA states that a telecommunications carrier's equipment, facilities or services "installed or deployed" on or before January 1, 1995, shall be considered to be in compliance with the assistance capability requirements of CALEA until the Attorney General agrees to pay all reasonable costs of retrofitting such equipment, facilities or services, on March 20, 1997, the FBI promulgated regulations that, among other things, defined "installed or deployed" as follows:

Installed or deployed means that, on a specific switching system, equipment, facilities, or services are operable and available for use by the carrier's customers.<sup>35</sup>

By defining the two separate words "installed" or "deployed" to have the same meaning, the FBI with one stroke renders entire classes of switching equipment obsolete unless upgraded at carrier expense.

Industry will challenge the FBI's arbitrary and capricious definition of "installed or deployed" in federal court. In the meantime, the Commission should initiate a Section 109 proceeding to determine whether compliance is reasonably achievable under the Department's definitions for post-January 1995 installations of already deployed equipment, services or facilities. It makes no sense to put carriers and manufacturers to the work of designing solutions that pre-standard carriers cannot afford to purchase.

The Carrier Associations note that, in any case, the Commission has the obligation in a deficiency proceeding to address the cost of compliance and the impact on competition before
